

NF Model Peelers

More power to you.

Machines that wash, scrub, and peel.

How it works:

Magnuson NF Model Peelers utilize the latest technology in machinery design and construction to provide both high capacity and superior quality washing, scrubbing, and peeling in a maintenance-friendly machine.

The NF Models offer "live-action" peeling by means of the uniformly controlled, variable speed auger, which conveys product through a rotating cage with rotating rolls. This efficient means of product handling guarantees even exposure to the rolls (longer roll life) for efficient performance (fewer flat spots on product due to natural tumbling).

By utilizing high-tech design and construction, most grease points have been eliminated and replaced by water lubrication in the product zone. Magnuson NF Model Peelers are the ideal machines for a wide range of products and applications.

Technical Information:

- Model options: NF-24 & NF-18 (multiple configurations available)
- Capacity: Up to 40,000 lbs/hr. (depending upon application)
- Approx. dimensions: 88.5" H x 50.5" W x 137" L
- Water: 5 to 30 GPM (18 to 113 Liters)
- Drive: Electric 15.75 HP - 21 HP
- Rolls: (24) brush or abrasive: (18) brush, abrasive, rubber disc
- Variable frequency controllers for roll and auger speed adjustments
- Stainless steel discharge hopper
- Most common voltages available

Features and Benefits:

WASH, SCRUB, AND PEEL AT HIGH VOLUMES

Latest technology designed to work exceptionally well and at high capacity.

HARNESS "LIVE ACTION" PEELING

Uniformly controlled, variable-speed augers convey product through rotating cages with rotating rolls.

WIDE RANGE OF PRODUCTS & APPLICATIONS

Flexibility built for fruit, vegetables, nuts, and more.

HASSLE-FREE MAINTENANCE

Spend more time improving productivity and less time adjusting the machinery.

EFFICIENT DESIGN CONFIGURATION

Provides product tumbling, processing & flow-through, as well as separation/discharge of waste.
