

Electric Hand Fed Corn Cutter

More power to you.

More edge to stay ahead.

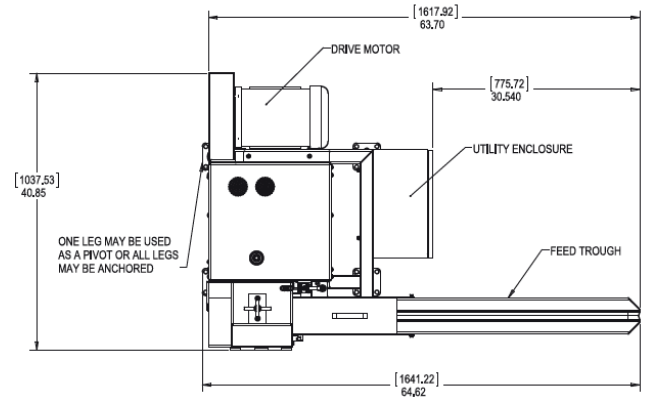

How it works:

The **Electric Hand Fed Corn Cutter** is engineered to provide an affordable and efficient solution for corn cutting, positioned as a cost-effective alternative to the CCM Automatic and CCM Hydraulic Hand Fed Corn Cutters. This machine is built with simplicity and reliability in mind, offering a user-friendly design that minimizes operational complexity. Its electric-powered system ensures consistent performance while maintaining a low maintenance profile. The cutter features a spring-loaded cutting head that provides smooth operation and can clear itself in the event of a jam, minimizing downtime. Additionally, the lock-down head ensures secure operation, adding an extra layer of safety and stability during use.

With its compact design, the machine occupies minimal floor space, making it perfect for environments where space is limited.

Technical Information:

- Approx. dimensions: 42.1" H x 40.9" W x 66.6" L
- Water: 0.12 GPM (0.45 Liters)
- Electric Requirements: 5 HP, 9 Amps @ 460 V

Features and Benefits:

AFFORDABLE [®]

Offers a budget-friendly alternative to higher-end models without compromising on performance.

SPACE-EFFICIENT

Its compact footprint with a pivoting 4 leg frame makes it a great choice for operations with limited space.

EASY TO OPERATE

Intuitive controls in one operator accessible box allow for quick training and minimal supervision.

LOW MAINTENANCE

The design reduces the need for frequent upkeep, ensuring less downtime and lower operational costs.

RELIABLE PERFORMANCE

Built to last with stainless steel, the machine consistently delivers dependable results day in and day out.
